

DID YOU KNOW?

Your pet's skin is the **LARGEST ORGAN**—thinner than human skin, with a higher pH, making it prone to irritation, dryness, and itching. In atopic, allergic, or xerotic dermatosis, pets get trapped in an **itch → inflammation → barrier-breakdown loop**.

Most shampoos only cleanse often stripping lipids and can worsen dryness and flare ups overtime.

AVOPEA
PET SHAMPOO

DERMATOLOGY
GRADE CARE
FOR DOGS & CATS.

AVOPEA Combines

- **Palmitoylethanolamide (PEA):** Anti-pruritic, anti-inflammatory support.
- **Bio-mimetic ceramide complex (Ceramide NP, AP, EOP + Phytosphingosine + Cholesterol):** Rebuilds lamellar lipids.
- **Niacinamide + Sodium Hyaluronate + D-Panthenol:** Boost ceramide synthesis, hydrate, and speed barrier repair.
- **Sulfate-free cleansing base (SCI, SMCT, Decyl Glucoside, CAPB, Sodium Lauroyl Lactylate):** Gentle cleansing with salon-grade conditioners (PEG-7 Glyceryl Cocoate, Guar Hydroxypropyltrimonium Chloride (GHPTC), Divinyl dimethicone/Dimethicone Copolymer) for a smooth, shiny, tangle-free coat.

Designed For CANINE AND FELINE SKIN,

AVOPEA® addresses the complete
ITCH-INFLAMMATION-BARRIER CYCLE
in every wash.

The 3R ACTION

RELIEVE

Rapidly Calms Itch & Redness with PEA + Niacinamide

REPAIR

Rebuilds the skin barrier with a multiceramide matrix, Sodium Hyaluronate & Panthenol

RADIATE

Revives the coat with gloss & detangling conditioners (Divinyl dimethicone/Dimethicone Copolymer, GHPTC, PEG-7 Glyceryl Cocoate)

Why Vets Choose AVOPEA PET SHAMPOO

- **Targets pathophysiology, not just dirt:** pruritus control + lipid replacement
- **Sulfate-free** mild surfactants (SCI, SMCT, Decyl Glucoside, CAPB, Sodium Lauroyl Lactylate)
- **Hard-water performance** with Trisodium Ethylenediamine Disuccinate.
- **Balanced pH for dogs & cats**
- **Clean preservation:** Phenoxyethanol + Caprylyl Glycol + Ethylhexylglycerin + Sodium Benzoate; paraben- & soap-free

FAQs

Q1. Can AVOPEA® replace medicated (antimicrobial) shampoos for my Dogs?

Use antimicrobials when infection is present. AVOPEA® is ideal **between flares** to keep itch low and **rebuild the barrier**, helping reduce relapse risk.

Q2. How fast will my pet feel better?

Many guardians report **comfort after the first few washes** with correct contact time; persistent cases should follow the vet's regimen.

Q3. Is it safe for cats?

Yes - **species appropriate pH** and **feline-safe preservative system**. Avoid essential oils and fragrances that cats dislike. AVOPEA® is formulated without them.

Q4. Can I use it with oclacitinib / lokivetmab / steroids?

Yes, AVOPEA® is a **supportive adjunct** that helps maintain results and comfort **between doses**. Please speak to your veterinarian for more information.

Pack Size

200 ml Premium Bottle

PET FRIENDLY Formula

Hypoallergenic

pH Balanced

Alcohol Free

Paraben Free

Sulphate Free

Soap Free

BENEFITS (What you'll notice)

- Soothes **inflamed, allergy prone** skin
- Reduces **itching & irritation** between vet visits
- **Moisturizes & hydrates** without greasy feel
- Helps **restore the skin barrier**; less flaking, healthier coat
- **Tangle-free grooming** with lasting, natural gloss

DIRECTIONS FOR USE

Wet Your Pet's Coat Thoroughly

Apply **AVOPEA®** and Gently Lather from Head To Tail (Avoid Eyes & Nose)

Leave for 5-10 minutes for deep action

Rinse well and towel dry

FREQUENCY

Active phase: 2-3x weekly for 2-3 weeks (or as advised by your veterinarian).

Maintenance: 1x weekly to 1x fortnight.

Compatibility tips: Keep a 3-5 day gap around spot-on ectoparasiticides. For dense coats, pre-dilute 1:5 to 1:10 for easier spread.

WHO IS IT FOR?

- **Dogs & cats** with **atopic/allergic** skin or recurrent **dryness & pruritus**
- **Post-flare rehabilitation** after infection control
- **Routine maintenance** in sensitive-skin breeds or long coats

Disclaimer: Not a substitute for antimicrobials or ectoparasiticides when infection/infestation is present. Use as an adjunct per veterinary advice.
